

Exercise Session – Employees

Luca Ezio Pozzoni

Politecnico di Milano

lucaezio.pozzoni@polimi.it

Goal

- Implement a program managing the salary payments for different categories of employees (secretaries, developers and managers)
- Each employee has a `name`, `surname`, an `employee_ID` and a `pay_rate`
- The pay for developers and managers depends also on their workshop attendance rate (`wsh_rate`)
- Managers' pay depends also on their mission rate (`m_rate`)

Salary Calculation

Salaries must be computed according to the following formulas:

- **Managers:** $((\text{work_hours} - \text{m_hours} - \text{wsh_hours}) * \text{pay_rate}) + (\text{m_hours} * \text{m_rate}) + (\text{wsh_hours} * \text{wsh_rate})$
- **Developers:** $((\text{work_hours} - \text{wsh_hours}) * \text{pay_rate}) + (\text{wsh_hours} * \text{wsh_rate})$
- **Secretaries:** $(\text{work_hours} * \text{pay_rate})$
